

Single Number

Given a **non-empty** array of integers (**numbers**) every element appears twice except for one, Find that single one.

You must implement a solution with a linear runtime complexity and use only constant extra space.

Example:

Input: nums = [2,2,1]

Output: 1

Example:

Input: nums = [4,1,2,1,2]

Output: 4

Example:

Input: nums = [1]

Output: 1
